

Vesphene III Phenolic Disinfectants are specifically formulated for the routine disinfection of hard, non-porous surfaces. Vesphene III disinfectants are processed and packaged in a variety of options to meet your specific application needs. At a use dilution rate of 0.8% v/v (1:128), the Vesphene III disinfectants kill a broad spectrum of common bacteria and fungi. The alkaline Vesphene III disinfectant formulation can be used alone or in rotation with the LpH® III Phenolic Disinfectants. These products have an extensive documentation package to meet your validation objectives and are supported by the STERIS Technical Services team for individualized application and validation assistance.

Vesphene® III Phenolic Disinfectants

Our latest high pH disinfectant

Features

Proven tuberculosis (*Mycobacterium tuberculosis*, var. bovis) efficacy

Broad spectrum efficacy against bacteria, fungi, and viruses using AOAC protocols

Superior material compatibility

Formulated with biodegradable surfactants

Active ingredients are ortho phenylphenol (OPP) and ortho benzyl para chloro phenol (OBPCP)

Sterile version is gamma irradiated and each lot USP sterility tested

Manufactured in accordance with cGMP with complete lot traceability

Benefits

Indicative of potential efficacy against less

Confirms efficacy against many common microbes

Allows for high frequency use on most surfaces

Reduces environmental impact of disposal while maintaining excellent cleaning ability

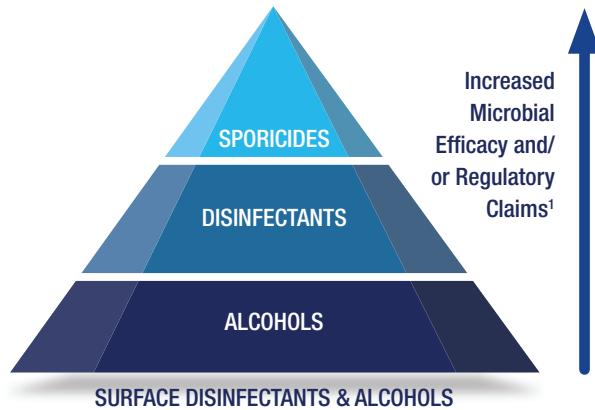

Registered by the United States Environmental Protection Agency (EPA)

Facilitates introduction into your critical areas

Supports quality assurance and quality control goals

Applications

- Surface disinfection and microbial control:
 - » Floors
 - » Walls
 - » Ceilings
 - » Countertops
 - » BSL hoods
 - » Carts and other equipment
- Products may be applied by:
 - » Mopping
 - » Wiping
 - » Spraying

¹ Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

The foundation of any contamination control program is the disinfectant that should be used daily. Disinfectants should be used on a scheduled rotation with a sporicide based on your environmental data. Historically, multiple disinfectants have been rotated, but if your disinfectant has broad spectrum efficacy, this may not be necessary. Either used alone or rotated with the acidic LpH III Disinfectant family, the alkaline Vesphene III Disinfectants offer excellent material compatibility for daily use. Our Technical Service group can help customize your contamination control program to take advantage of this excellent product.

Ordering Information (Worldwide)
